‘Green Sea Turtles are big’
(‘Las tortugas marinas verdes son grandes’)

Actividad de ejercitación.

Green sea turtles are big. These turtles live in the coastline of Australia, Costa Rica and of other 78 countries. They live underwater, where they can rest quietly for five hours at a time before coming up for air. The first years they eat plankton. When they are older, they eat sea grass. Baby sea turtles are in danger. Animals such as birds, crabs, and raccoons can easily attack them when green sea turtles move slowly from their nests out to the sea. Adult green sea turtles have a lot of problems. Human beings and pollution affect them seriously.

‘India is the land of contrasts’
(India es el país de los contrastes)

Actividad de ejercitación.

I. - Read the following text and answer the questions.

My short trip to India

I went to India with a couple of my best friends but it was a short trip. We stayed there for 7 days and travelled by plane.

I liked this country very much because I experienced a feeling of total freedom. There was a special connection with nature in India because there were a lot of animals walking freely through the streets, even in very urban places like Mumbai. But India is a land of contrasts as everyone says. You can see extremely poor and extremely rich people. However, people in India are really happy.

Indians work a lot and many people work on Sundays. Things happened all the time around you. There were people offering you things, fixing things or painting their stores. In Mumbai there were many bookshops where you could find best sellers.

What I like the most in India were rickshaws. These are small vehicles pulled by one person on foot or on a bicycle that transport tourists.

I really miss India.
